Summary

Full-Stack Engineer with **3.8+ years** building and shipping **production web and mobile applications** end-to-end using **React Native, React.js, Next.js, Node.js, NestJS, and AWS**. Experienced in **serverless architecture with AWS Lambda**, REST and GraphQL API design, scalable backend systems, and **Web3 applications including non-custodial wallets, crypto payments, and blockchain integrations**. Delivered **35% performance improvement, 40% faster API response times, and 60% crash rate reduction** across fintech, agri-tech, retail, and blockchain products. Uses **AI-native workflows** Claude, Cursor, and Copilot to ship faster without sacrificing quality.

Skills

Languages: JavaScript (ES6+), TypeScript, Swift, HTML, CSS, SQL, C/C++

Technologies and Tools: React Native, Expo, SwiftUI, React.js, Next.js, Redux, Zustand, Node.js, NestJS, REST APIs, WebSockets, Web3.js, Ethers.js, WalletConnect, MetaMask SDK, Thirdweb, GraphQL, Firebase, AWS (Lambda, API Gateway, S3, CloudWatch), MongoDB, SQLite, Realm, Tailwind CSS, Material UI, Styled Components, Git, GitHub Actions, CI/CD, Xcode, Android Studio, Fastlane, Sentry, Docker, Figma, Payment Integrations, Sumsub, Reap, UR, KYC/KYB Integrations

AI and Agent Tools: Claude Code, Antigravity, GitHub Copilot, Cursor, GPT-4, AI-native development workflows, Rapid Prototyping with AI agents

Experience

The Unmarketing Agency Nov 2025 – Present
Full-Stack Developer (Software Engineer II)

- Built a full-stack cross-platform Property Search application from scratch using **React Native, Next.js (SSR) on the frontend** and **Node.js and NestJS on the backend**, shipping to App Store, Play Store, and web within deadline
- Designed and deployed **serverless REST APIs using AWS Lambda and API Gateway**, reducing infrastructure costs and enabling automatic scaling with zero server management
- Reduced new feature development time by **30%** by designing a modular component architecture, reusable UI system, and shared backend service layer across web and mobile
- Improved screen rendering and API response performance by **25%** by optimizing data fetching, state management with Zustand, and backend query efficiency
- Accelerated development velocity by **40%** by integrating Cursor and Claude into daily workflow for full-stack code generation, iteration, and rapid prototyping

Corenet Tech Apr 2025 – Oct 2025
React Native Developer (Software Engineer II)

- Increased user engagement by **25%** and MAU by **22%** by architecting the full-stack system for Grabit (Play Store) and App Store, a geo-spatial hyperlocal offers platform serving **1,000+ daily active users**
- Reduced push notification latency by **60%** by engineering event-driven backend architecture with **Node.js** and **AWS Lambda** for Grabit Business (Play Store) and App Store, serving **1,000+ businesses**
- Improved app responsiveness by **35%** and reduced memory footprint by **28%** by redesigning Redux architecture on the frontend with memoization and list virtualization
- Achieved **99.5% crash-free rate** and improved team code quality by **40%** by establishing Sentry monitoring, API error handling standards, code reviews, and mentoring 2 junior engineers

Shri Hari Info Solutions Nov 2022 – Mar 2025
React Native Developer (Software Engineer I)

- Achieved **4.9 rating**, **10,000+ downloads**, and **80% retention** by delivering Hariprabodham Vrund (Play Store) and App Store, a full-stack streaming platform with offline-first architecture and background sync
- Enabled reliable data access for **1,000+ farmers** in low-connectivity areas by building Krisiyukta (Play Store), a full-stack agri-tech app with conflict-resolution sync and SQLite optimization
- Maintained **99.9% uptime** with sub-second processing by architecting OptoX, a full-stack DeFi platform with **NestJS backend**, Web3 wallet integration (WalletConnect and MetaMask), milestone-based payment flows, and blockchain transaction workflows
- Reduced database query time by **40%** and API response time by **30%** by implementing **GraphQL APIs in NestJS** for eRemotehire, an AI-powered hiring platform, while cutting crash rates by **60%** via performance profiling

PROJECTS

DokWallet 2025 – Present
Open-Source Non-Custodial Crypto Wallet: dokwallet.com

- Building a multi-chain non-custodial crypto wallet with secure wallet creation, encrypted backup and restore, transaction signing, and real-time balance synchronization
- Implemented blockchain integrations using **Web3.js, Ethers.js, WalletConnect, MetaMask, and other Blockchain SDKs**
- Focused on secure key management, wallet recovery flows, transaction validation, and production-grade mobile, web and backend architecture

KimlCards 2025 – Present
Web3 Crypto Card Platform: kimlcards.com

- Contributing to a crypto-powered card platform bridging digital assets with real-world payment experiences
- Working across Mobile, Web, backend integrations, KYC/KYB onboarding flows, and payment-related user journeys
- Integrated third-party verification providers including **Sumsub, Reap, and UR** for identity and business verification workflows

EDUCATION

Veer Narmad South Gujarat University Aug 2021 – Jul 2024
Bachelor of Computer Applications (BCA), Information Technology **CGPA: 8.5/10**

Relevant Coursework: Mobile Application Development, Web Technologies, Data Structures and Algorithms, Database Management Systems, Software Engineering, Object-Oriented Programming, Computer Networks, Operating Systems
